

Town of Binghamton Water & Sewer Dept.
865 Hawleyton Rd.
Binghamton, NY 13903

June 1, 2024

Dear Town of Binghamton Municipal Water User:

In order to comply with State and Federal regulations, it is necessary for the Town of Binghamton to issue an "Annual Drinking Water Quality Report for 2023" regarding the quality of our water.

Since we get our water directly from the City of Binghamton, we are attaching their "Annual Drinking Water Quality Report for 2023" for your information.

In addition, we are required to notify you of any detected contaminants in samples that we collected in the Town of Binghamton for the year 2023. Please see the "Table of Detected Contaminants" below. As you can see by the table, our system had no violations. During 2023, our system was in compliance with applicable State drinking water operating, monitoring and reporting requirements. During lead testing in 2022, we did not have any home testing above the Action Level of 15 ug/l. However, we are required to inform you about lead with the following statement.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women, infants, and young children. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. The City of Binghamton is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (1-800-426-4791) or at <http://www.epa.gov/safewater/lead>.

The Town of Binghamton takes great strides to ensure safe and healthy drinking water. We want to ensure you that the water in your home is safe. We conduct water sample testings each month in all of our water districts. We will continue to conduct these tests on a routine basis to ensure safe drinking water.

If you require any further information regarding this matter, you may contact Mark Leighton in the Town of Binghamton Water Department by calling 669-4323.

Sincerely,

Mark Leighton, Water Dept.
